JULY, 2014, Vol. VI, 84

Les Leckron, Chairman

Joanie Opperman, Editor

Member of FLORIDA FEDERATION OF GARDEN CLUBS

CHAIRMAN'S MESSAGE

What a wonderful time of fellowship and eating we had at Jackie Behm's on June 29th. Thanks Jackie for hosting the gathering. Thanks to Buck for grilling meats and boiling corn - I heard lots of compliments about your cooking! Thanks also to all that brought side dishes, desserts and drinks. It was nice to get together, relax and chat - I'm sure we'll do that again!

Heat stress can be a killer here in Florida! Don't over-do, take frequent breaks, hydrate and work when it's cooler. The weeds will be there at sun-up and maybe that's a better time to be outside at this time of year. Hope everyone is having a great start to the Summer! Keep it Growing! Les

JULY IN THE GARDEN

June has brought much needed rain, and July is also expected to be a wet month with 7 to 10 inches of rain in north Brevard County. July will be very hot making it one of our most uncomfortable months for gardening. Despite the heat, routine garden maintenance should continue. Work early or late in the day, apply sunscreen and wear a head cover. Save water by turning off your automatic sprinkler system and operating the system manually as needed.

If you did not fertilize your lawn in May or June, it is still not too late to apply a good 16-4-8 fertilizer. If Bahia lawns still show yellowing, additional iron should be applied. Sod-web worms could arrive in July. They feed heavily on St. Augustine, but will attack other lawns. Watch for grass that is chewed close to the ground, as if cattle had grazed. Chinch bugs may also be active in July. Mole Crickets are active in Bahia and Bermuda lawns and should be treated now. Use Mole Cricket Bait, spray/granules. Follow label instructions.

GRAPE MYRTLES have been blooming beautifully, but this can be only the beginning. Prune back each cluster to reasonably large stems before seed pods form. Remember, strong branches can only grow from branches larger than themselves. If mildew occurs, spray with a good fungicide. In 4 to 8 weeks, you should have a second flush of blooms.

Continue to pinch new growth, except AZALEAS, CAMELLIAS and GARDENIAS to assure thick, compact plants. Use the cuttings to root new plants. Prune POINSETTIAS to develop compact plants. Divide and repot ORCHIDS and BROMELIADS. Fertilize shrubs and flowers lightly every 3 to 4 weeks. Feed outdoor container plants every 2 to 3 weeks. Transplant PALMS and SAGOS during our rainy season. Remove weak or

diseased tree limbs that could be damaged by storms. Make a weekly trip through your garden to check for insects, diseases or other problems. Watch for yellowing or scorching – a sign of Spider Mites. Blast them off with a hard stream of water or spray Mites with a summer oil home citrus spray which will help control mites, scale and whitefly. Use Natural or Organic sprays.

Hot weather plants that add color to the landscape include BEGONIAS, BLUE DAZE, CALADIUMS, COLEUS, IMPATIENS, MARIGOLDS, PENTAS, PERIWINKLE, SALVIA and VERBENA. Add an additional thin mulch layer to flower beds to conserve moisture and control weeds.

Accentuate With Annual Flowers

Annual flowers are the candy of the gardening world. They kick things up a notch in the garden and are an easy way to add a burst of color if you're on a budget. One of the best uses for annual flowers is to brighten up high-traffic areas like mailboxes, sidewalks, and front doors. Whether in containers or in the ground, annual flowers provide a way to add something new without breaking the bank. And, because annuals generally grow for just one season, they're a great way to try new color schemes and combinations without fully committing.

TREE FARM NEWS –

Mist house has lots of propagated plants ready to up-pot then be placed in proper corral. Great job and thanks to those who started cuttings. We need to propagate Indian Hawthorn, Gardenia, and other cuttings. If you are trimming at home, cut ends of plant about 6 inches long and place in moisturized bag. Plant cutting in a vacant, vermiculite/perlite mixed bin, coat cutting with Ru-tone. Identify with your name, date, and species--see anyone at Tree Farm Tuesday or Thursday mornings for help.

Titusville Garden Club – Day Group - (Resumes in the fall)

Florida Native Plant Society – Sea Rocket Chapter

The Sea Rocket Chapter's meetings are held on the 4th Wednesday of the month; 7 p.m. to 9 p.m. at the ENCHANTED FOREST on Hwy. 405. The public is welcome.

Joanie's Corner – Rain Lilies

Rain lilies are plants with dainty, funnel-shaped blooms that pop up overnight after a heavy rain. The flowers of this member of the amaryllis family come in subtle shades of white, yellow, pink, or red. The narrow, grass-like foliage of rain lilies blends in well in rock gardens and borders. In containers, they do best when crowded. Rain lilies can be cultivated in the garden and will flower spring through fall if kept alternately wet and dry. They overwinter easily throughout the state. Rain lilies prefer full sun to part shade and do best in moist, well-drained soil.

You can transplant rain lilies, or you can purchase some of the small bulbs to plant. They're very low maintenance, and their delicate blooms will surprise you when they appear!

Become a New Member!! YOU Are Welcome

We are always looking for new members and have great opportunities for learning at our monthly meetings, at the Tree Farm and at special events. We have facilities to start plants from seeds/clippings. For more information, call: RoseMarie: 385-9051.

Titusville Men's Garden Club
Meets 2nd Monday of each month at 7:00 p.m.
Garden Center
5275 Sisson Road
Titusville, FL
NO MEETING IN JULY!!

The Titusville Men's Garden Club

Next Meeting: 2nd Monday of Month, 2014 -- 7:00 p.m.

Titusville Garden Center, 5275 Sisson Road, Titusville, FL 32780

INVITATION TO JOIN THE TITUSVILLE MEN'S GARDEN CLUB

Who We Are: A non-profit club that enjoys gardening and contributing to our City's beautification and our environment.

What we Are: As a part of the Florida Federation of Garden Clubs, we are a partner of the Titusville Garden Club.

What We Do: We educate and help each other to enjoy gardening, teach and learn to enjoy plants. We assist others to propagate, grow and distribute trees and plants to non-profit organizations. We participate in voluntary efforts to help Titusville's "Tree City" initiative to plant 2,000 trees per year.

Where We Meet: We meet on the second Monday of each month at 7:00 p.m. at the Garden Center, 5275 Sisson Road (south of SR 50 / north of SR 405). We also meet at our Tree Farm near the Titusville Water Maintenance Facility. Members adopt trees and plants to grow and have fun.

How We Operate: We presently sponsor an April and an October Tree and Plant Sale. The sales receipts are used to support the Club, purchase materials, and donate plants to the City and other worthy non-profit causes. Some members grow plants to landscape their own homes (all are welcome to do so). With permission from a plant's adoptee, members may take plants for personal use. Dues are \$25.00 annually, due in April.

Send application below to Titusville Men's Garden Club, P. O. Box 1783, Titusville, FL 32780.
