Duane "Buck" Cowen, Chairman

Joanie Opperman, Editor

Member of FLORIDA FEDERATION OF GARDEN CLUBS

Chairman's Message

Hi fellow gardeners.

Well, let me tell you! As chairman I have learned some time ago, time really flies! It seems I just finished submitting my last article. Down to business, as always, the Tree Farm looks great! I had to make an emergency trip. After being gone for two weeks, seeing the farm on my return looking so, so nice was great! The "moving and grooving" weed eradicators and propagators didn't miss a beat! We, as a group, are so lucky to get along as we do! It is even nice that little tiffs pop up here and there. It shows we are human, and we can discuss improvements. We are getting close to our Fall Tree & Plant Sale! Be prepared to discuss it at the meeting; we must be ready. Our Tree Farm Managers are doing such a great job improving the area. I, for one, am happy I'm a member, hope you are too. See you at the farm or a meeting. Just Me, Buck

SEPTEMBER IN THE GARDEN

September will be as hot and humid as August, and will bring about as much rain as last month. Changes that will affect our plants: night time temperatures will begin to drop and shorter daylight hours will induce some plants to set buds.

Because plants in Florida grow continuously, regular pruning is a must. Fall pruning and fertilizing should be done early to allow new growth to harden. Late pruning and fertilizing will stimulate new growth that could be damaged by cold in December or January. Prune declining fronds and flower stems from PALMS. Renew mulches to save water and reduce weeds.

Do not prune AZALEAS, CAMELLIAS or GARDENIAS as their buds are already set. CAMELLIAS often set two buds side by side. If you would like larger but few blooms, pinch one of them off. Make sure you can distinguish between leaf and flower buds

Give POINSETTIAS a final pruning before September 15. Watch for mildew, white flies and tomato worms. Spray and prune ROSES, removing old flowers, hips and dead, damaged or spindly growth. Fertilize to encourage fall blooming.

. Where needed, complete seeding of Bahia turf as early as practical in September. Always follow label instructions. Operate sprinkler systems manually to

conserve water. Water lawns when grass shows signs of stress.

Pinch CHRYSANTHEMUMS and spray for aphids mites, mildew and blackspot. Feed until color shows in the buds. Feed hanging baskets and ORCHIDS every two weeks. Feed shrubs, perennials and container plants for Fall.

CHRISTMAS CACTUS should receive their last feeding this month. Move them into partial sun- shine and reduce watering until buds appear.

Till and re-plant flower beds. If you did not start annual flowers from seeds, local nurseries or garden shops will have a selection of plants that will provide color in your yard this Fall and Winter to include ALYSSUM, CALENDULA, CLEOME, CORNFLOWER, DIANTHUS, GAILLARDIA, HOLLYHOCK, PERIWINKLE, PHLOX, SALVIA, SNAPDRAGON & VERBENA. Wait another month to plant PANSIES and PETUNIAS.

FALL VEGETABLE GARDEN - RoseMarie

Fall is my favorite time of year to plant the vegetable garden, and now is the time to be preparing. Tomatoe seeds should have been started mid-August for transplanting into soil or large pots for the fall crop. If you haven't done that, Better Boy and Brandywine heirloom are good choices which you can buy at the garden

stores. If you plant into the ground, be enriching the soil with compost. Keep the weeds down so as to not deplete the soil of nutrients. It is fairly important to give the tomatoes an early start as the weather can sometimes turn cold quite early. Once the night time temp drops below 50 degrees, blossoms become infertile, and a frost or freeze ends the season quite abruptly.

Using Cinnamon for Pests, Cuttings, & Fungicide – By Anne Baley

Cinnamon is a wonderful flavor addition to cookies, cakes and any number of other foods, but to gardeners, it's so much more. This versatile spice can be used to help root cuttings, to prevent fungus from killing small seedlings and even for keeping pests away from your home. Once you learn how to use cinnamon powder for plant health, you'll think twice about grabbing harsh chemicals for your gardening needs.

Benefits of Cinnamon on Plants

The benefits of cinnamon on plants is widespread and you may end up reaching for the spice almost daily.

Cinnamon for pests

If you have a problem with ants [1] in your home or greenhouse, cinnamon is a good deterrent. Ants don't like to walk where cinnamon powder lays, so summer ant problems will be decreased. Use cinnamon for pests inside and outside your house. Find their entryway and sprinkle cinnamon powder in the path. Cinnamon won't kill the ants in your home, but it will help to keep them from coming inside. If you have a problem with ants in your child's sandbox, mix a container of cinnamon powder with the sand, mixing it well. Ants will steer clear of the sand.

Cinnamon as rooting agent

Cinnamon as a rooting agent is as useful as willow water [2] or hormone rooting powder [3]. A single application to the stem when you plant the cutting will stimulate root growth in almost every plant variety. Give your cuttings [4] a quick start with the help of cinnamon powder. Pour a spoonful onto a paper towel and roll damp stem ends in the cinnamon. Plant the stems in fresh potting soil [5]. The cinnamon will encourage the stem to produce more stems, while helping to prevent the fungus that causes damping-off disease.

Cinnamon fungicide control

Damping off disease [6] is a fungus-based problem that hits small seedlings just as they begin to grow. Cinnamon will help prevent this problem by killing the fungus. It also works with other fungal problems exhibited on older plants, such as slime mold [7] and with deterring mushrooms in planters[8].

Take advantage of cinnamon fungicide control by making a cinnamon spray for plants. Stir some cinnamon into warm water and allow it to steep over- night. Strain the liquid through a coffee filter and put the results into a spray bottle. Spray the stems and leave of affected plants, and mist the potting soil in plants that have a mushroom problem.

.....

Florida Native Plant Society – Sea Rocket Chapter
The Sea Rocket Chapter's meetings are held on the 4th Wednesday of the month; 7 p.m. to 9 p.m. at the ENCHANTED FOREST, 444 Columbia Blvd (Hwy 405) The public is welcome. For information: 264-5185 <http://www.nbbd.com/npr/SeaRocket/>

TREE FARM REPORT –

The plants and trees continue thriving, thanks to the terrific Tuesday and Thursday crews and the rest of members preparing them for our sale October 7th and 8th. Many propagated plants in the Mist House are ready for up-potting. Our Oaks are getting too big so we will try to plant them along Titusville's roadways and parks. Thanks to all who have planted and cared for all of our plants at the Tree Farm.

Titusville Garden Club – Day Group -

From the Prez: *Welcome back from summer vacation, Members! Our first meeting is on September 7th at 9:30a.m. *coffee & donuts**

COMMUNITY CALENDAR

Sept 3 - Gainesville Kanapaha Botanical Gdn

Guided tour the 1st Saturday of every month at 10a.m. For more information visit kanapaha.org

Sept 9-11, Orlando Fall Home & Garden Show

Convention Center. Tickets are available at www.showtechnology.com/event/Orlando-fall-home-garden-show

Sept 17 – Fall Garden Festival – 9am - 2pm

Brevard Botanical Garden – 3695 Lake Drive, Cocoa (633-1702x0) Free admission & classes. www.brevardbotanicalgarden.org

COMMUNITY CALENDAR (continued)

Sept 15 – 17 The Landscape Show

Orange County Convention Center – \$15 for a show badge (pre-registration price honored until Sept 2) includes access to the Exhibitors Showcase featuring new plants & products.

October 7th & 8th Fall Tree & Plant Sale

Men’s Garden Club of Titusville welcomes all to the Tree Farm on Friday 9 – 5, or Saturday 9 – 3

Titusville Garden Club
Women’s Day Group
Is offering their new 2017
calendar for sale!!
Be sure to get yours!

Alternatives to Rooting Hormone – Mandy M.

- 1) Saliva – It protects the cutting from rotting- from being attacked by fungi and bacteria.
- 2) Honey – Honey tea is a natural antiseptic/preservative. Dissolve 1 tbsp of organic honey in 2 cups of warm water. Let cool before using. Store in sealed jar in cool, dark place. Will last 2 weeks.
- 3) Apple Cider Vinegar – A great alternative. Use 3 tsp apple cider vinegar to 1 gallon water.
- 4) Cinnamon – Kills fungus and bacteria; will help to keep cuttings free of disease while rooting. Cinnamon will minimize damping off in your seed flats, as well.

Become a New Member! You are welcome!

We are always looking for new members and have great opportunities for learning at our monthly meetings, at the Tree Farm and at special events. We have facilities to start plants from seeds & clippings. For more information, call Joanie @ 480-8807

Men’s Garden Club of Titusville

Meets 2nd Monday of each month at 7:00 p.m.

**Garden Center, 5275 Sisson Road,
Titusville. FL**

**Our next meeting is
September 12th, 2016!!
We will be discussing plans & prices
for our FALL TREE & PLANT SALE
on Oct. 7th & 8th**
